Steady, responsible, and hands-on by nature — I learn by getting into the systems I work on and figuring out how they actually behave. My goal is to build a career in cybersecurity, with a growing interest in applying AI to real infrastructure problems. I take ownership of what I'm given, work well in teams, and I'm currently putting that mindset into practice through hands-on experience in systems administration, IT support, and my first real project applying AI.

EXPERIENCE

IT Technician — COPATE (ASIR Work Placement) CURRENT 06/2026 – 11/2026

- General IT support and systems administration tasks during the work placement.
- First hands-on project applying AI: contributing to a production RAG virtual assistant — knowledge base structuring, document formatting for optimal chunking, and semantic retrieval tuning.
- Exposure to a self-hosted Docker stack (pgvector, a llama-based LLM, and Infinity for embeddings) and to debugging indexing performance on large documents.

Category Management Support — ALDI España 06/2023 – 08/2023

- Regional incident coordination and data management across Excel and SAP.
- Support to logistics platforms; product data management and updates.

IT Support — Infrastructure Execution — ALDI España 03/2023 – 05/2023

- On-site and remote incident resolution and escalation via Jira.
- Hardware and software setup, repair, and inventory management across store locations.

Systems Technician — Ajuntament de Rubí 06/2021 – 09/2022

- Network and user administration across a public-sector environment; incident resolution and escalation.
- Hardware and software maintenance, Office 365 and Moodle administration.
- Device inventory, software updates, and backup management.

EDUCATION

CFGS — Systems Administration in Networks (ASIR) — Cybersecurity specialization, Institut de l'Ebre 2025 – Present

Coursework: Operating Systems Deployment & Administration, Network Planning & Administration, Hardware Fundamentals, Database Management & Administration, Markup Languages & Information Management, Network & Internet Services, Web Application Deployment, Security & High Availability, Cybersecurity & Ethical Hacking, Security in Systems, Networks & Services, Professional English, Digitalization & Sustainability for Production Sectors.

CFGM — Microcomputer Systems & Networks — Dual Vocational Training, Institut l'Estatut 2020 – 2022

Coursework: Computer Assembly & Maintenance, Single-user & Network Operating Systems, Office Applications, Local Area Networks, IT Security, Network Services, Web Applications.

Secondary Education (ESO) — Regina Carmeli 2014 – 2018

SKILLS

Systems & Infrastructure

Linux · Windows Server · Active Directory · Docker ·
Networking · Office 365 · Backups

Virtualization & Labs

Proxmox · VMware · VirtualBox

Security Tools

Nmap · Wireshark · Kali Linux

Development & Tools

Python · SQL · HTML/CSS · JavaScript · Git/GitHub · Jira
· SAP

CURRENTLY FOCUSED ON

- Cybersecurity fundamentals & ethical hacking (CFGS coursework)
- Applied AI — LLMs and RAG systems, through the COPATE placement
- Cloud fundamentals (Azure)

LANGUAGES

Spanish	Native
Catalan	Native
English	Advanced
German	Intermediate

CERTIFICATIONS & OTHER

- Google IT Support Professional Certificate
- Driving licence (Cat. B) & own vehicle
